# Structured Data: Import Format

## Using Excel Template

The screenshot displays the Microsoft Excel interface with a structured data template. The ribbon is set to 'Home', and the 'File' menu is open. The spreadsheet shows a table with the following columns: Code, Name, Jurisdiction, Type, Status Group, Status, Responsible Office, Region, and Interest. The 'Responsible Office' column is currently selected, and the cell G2 is highlighted. The status bar at the bottom indicates 'Ready' and 'Accessibility: Good to go'.

# Structured Data: Import Format

## Using Excel Template

The screenshot displays the Microsoft Excel interface with a spreadsheet template. The title bar shows the file name "License Importer.en.With Structured Data (2) - Excel" and the user "Mike Baumgartner". The ribbon is set to "Home", and the "Font" group is active. The spreadsheet has a header row (row 1) with the following columns: "Code", "Name", "Jurisdiction", "Type", "[Child Node Name]", and "Node: [Child Node Name]". The rest of the spreadsheet is empty. The status bar at the bottom shows "Ready", "Accessibility: Good to go", "Licenses", "Structured Data Root Node Name", "Sheet3", and "140%" zoom.
